**Prof. Don Greenberg announced as First Featured Speaker for Singapore SIGGRAPH conference in December.**

Friday, 11 July 2008

SIGGRAPH Asia is pleased to announce its first featured speaker, Prof. Don Greenberg.

Advertisement

Prof. Greenberg has been researching and teaching in the field of computer graphics since 1966. During the past 30 years, he has primarily focused on advancing the state of the art in CG and applying these in a variety of disciplines. He has taught courses in CG in computer science, computer-aided design in architecture, computer animation in art, and technology strategy for business.

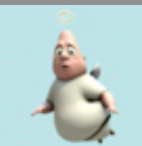

His current computer science research projects involve realistic image generation, parallel-processing algorithms for rendering, new GUIs, and computer animation. His current application projects include ornithology and the

search for the ivory-billed woodpecker, medical imaging and virtual surgery, architectural design for a green environment, and new types of computer displays, from electronic paper to touch-sensitive table displays.

Speaking on the topic of "The Expanding Boundaries of Computer Graphics", Prof. Greenberg will challenge the new generation of CG artists - those who will take great professional risks to solve big problems - to dream impossible dreams and extend the influence of computer graphics to many other disciplines.

Prof. Greenberg has also been accorded several awards in the course of his work; some of which include: the ACM SIGGRAPH Steven A. Coons Award for Outstanding Creative Contributions to Computer Graphics in 1987 and the NCGA Academic Award (the highest educational award given by the National Computer Graphics Association) in 1989.

Prof. Greenberg is currently the Director for the Programme of Computer Graphics at Cornell University. Many of his graduate students have gone on to become leaders in the fields of computer graphics, computer animation, and computer-aided design for architecture.

Six former students have won Hollywood's Technical "Oscars", and five have won the prestigious SIGGRAPH Achievement Award.
