### Fast Facts

The Computer Animation Festival is the most innovative computer animation festival in the world. Its internationally recognized jury receives hundreds of submissions and presents the best work of the year in daily Animation Theatre and Electronic Theatre screenings.

From 483 submissions, 45 films were accepted for inclusion in the Animation Theatre and 31 were accepted for the Electronic Theatre. There are more entries from Asia this year than last year, and from the 76 accepted submissions, 26 are from universities, while 50 are submissions from active game and film companies. Selections include outstanding achievements in time-based art, scientific visualization, visual effects, real-time graphics, and narrative shorts.

### Quote from the SIGGRAPH Asia 2012 Computer Animation Festival Chair, Nadia Magnenat-Thalmann, Nanyang Technological University, Singapore

"I would say that this year, the jury has selected films that are artistically a masterpiece with a meaningful scenario," says Nadia M. Thalmann, Chair of the SIGGRAPH Asia 2012 Computer Animation Festival. "Really, this year we have brought the computer graphics film festival towards the flavor of an arts festival where the technology is not really apparent. What counts is the story, the message that is brought to the attendee. The CG technology is used but it is for the sake of the art and not the technology itself."
