Wireless: 'ubcvisitor' is an unsecured wireless network that is accessible from most locations on the UBC campus. You will be asked to provide an email address on the login page.

However, if you are staying in a room in the UBC Gage tower accommodations, the concrete building will likely block the reception in your room. Wired internet is available in the rooms – contact the front desk if you need an ethernet cable. Or simply access the wireless from the lobby and outside the Gage towers.
