Go Planet, It's Your Earth Day: Stories on Environment and Climate

Computer graphics has come a long way in the world of storytelling — especially with the story of Earth. To celebrate Earth Day this year, we have gathered past ACM SIGGRAPH Blog content to shine a light on the computer graphics professionals who are bringing awareness to sustainability, environment, and climate change through their work. Continue reading for a captivating roundup of articles spotlighting our environmental challenges through the lens of computer graphics and interactive techniques.

ACM SIGGRAPH Professional Chapter Profile – London

Launched in 2004, the London ACM SIGGRAPH Professional Chapter promotes connections and information exchange by hosting a range of events related to computer graphics technology, animation, interactive and immersive technologies, and art for the computer graphics community in London. Click here for more information about the London ACM SIGGRAPH Professional Chapter and how to get involved.

ACM SIGGRAPH is Seeking Standing Chair Committee Candidates

Are you interested in leaving a meaningful impact within the community? Positions for the Early Career Development Committee, External Relations Committee, Lifelong Learning Committee, Research Career Development Committee, and Specialized Conferences Committee are now seeking candidates for the 2023 term.

For those interested in applying for any of these positions, please contact the Nominations Chair, Thierry Frey. Only applicants who are ACM SIGGRAPH members in good standing as of the application deadline will be considered. Click here for more information of the application process.

Updated Trends in VFX - ACM SIGGRAPH Professional Chapter Event

Tom Burns, Media & Entertainment CTO at Dell, gave a talk to the Toronto ACM SIGGRAPH Professional Chapter on 29 March 2023 regarding updated trends in VFX.

For those who were not able to make it to the event, you can view the talk here.

ACM SIGGRAPH's Computer Graphic Chronicles

Jim Blinn made his first computer generated pictures in 1968 while studying as an undergraduate at the University of Michigan. The results of Blinn's research have become standard techniques in today's computer animation systems.

Check out ACM SIGGRAPH's newest episode of Computer Graphic Chronicles with host Judson Rosebush and Guest Jim Blinn here.

Monthly Member Profile: Maureen Stone

This month's member spotlight features former Papers Chair Maureen Stone, an Industry Scientist now working as a Director of Tableau Research. Stone first became involved with ACM SIGGRAPH at The California Institute of Technology, where she enrolled in a computer graphics class taught by fellow ACM member Jim Blinn. Stone went on to attend her first SIGGRAPH conference in 1978 in Atlanta, and Blinn served as her tour-guide to both the conference and the community. Maureen expresses that the people she met in the ACM SIGGRAPH community were most influential in her decision to join, especially the group of women she found doing good work and getting things done. She recalls that though women were scarce in the computer graphics industry at the time, they never hesitated to go out of their way to support each other.
